

Government Schemes for Paddy Farmers (2026)

Paddy (Rice) is a staple crop in India, and the government provides several layers of support—from direct income to specialized insurance for flood-prone areas.

1. Direct Income & Financial Support

- **PM-KISAN (Pradhan Mantri Kisan Samman Nidhi):**
 - **2026 Update:** The annual financial assistance has been increased to **₹9,000** (up from ₹6,000), typically delivered in three installments of ₹3,000.
 - **Focus:** Provides basic economic security for seeds, fertilizers, and domestic needs.
- **Modified Interest Subvention Scheme (MISS):**
 - Provides subsidized short-term agricultural loans through the **Kisan Credit Card (KCC)**.
 - Farmers can get loans at an effective interest rate of **4%** (if repaid on time).

2. Risk Mitigation & Insurance

- **Pradhan Mantri Fasal Bima Yojana (PMFBY):**
 - **2026 Update:** A major new provision now covers crop loss due to **wild animal attacks** and **prolonged flooding** (submergence) in paddy fields, effective from the Kharif 2026 season.
 - **Coverage:** Protects against drought, pests, and local natural calamities from pre-sowing to post-harvest.
- **Weather-Based Crop Insurance (WBCIS):**
 - Specifically compensates for deviations in rainfall or temperature that impact paddy yields.

3. Production & Productivity Schemes

- **National Food Security Mission (NFSM-Rice):**
 - Provides subsidies on high-yielding variety (HYV) seeds, bio-fertilizers, and micronutrients.
 - Promotes the **SRI (System of Rice Intensification)** method which uses less water and fewer seeds.
- **Rashtriya Krishi Vikas Yojana (RKVY-RAFTAAR):**
 - Focuses on pre and post-harvest infrastructure. In 2026, there is a strong push toward **mechanization** (subsidies for tractors, power tillers, and harvesters).
- **Crop Diversification Programme (CDP):**
 - In states like Punjab and Haryana, the government offers incentives (up to **₹2,000–₹4,000 per acre**) for farmers to shift from paddy to pulses or oilseeds to conserve groundwater.

4. Special Initiatives for 2026

- **Dhan-Dhaanya Krishi Yojana (DDKY):**
 - Targets **100 "laggard" districts** with low productivity. It provides intensive support for irrigation and credit to boost paddy yields in these specific regions.
- **Digital Agriculture Mission:**
 - The creation of **Kisan IDs** (Digital Farmer Identities) to ensure subsidies and advisory services reach the farmer directly without middlemen.

Comparison of Key Paddy Benefits

Scheme Name	Primary Benefit	2026 Status
PM-KISAN	Direct Cash Transfer	₹9,000/year
PMFBY	Insurance	New Flood/Wild Animal cover
KCC (MISS)	Low-interest Loans	4% interest rate
NFSM-Rice	Seed/Input Subsidy	Focus on SRI & HYV seeds

Tip for Paddy Farmers: Ensure your **e-KYC** is updated on the PM-Kisan portal and your land records are "seeded" (linked) to your Aadhaar to avoid delays in the 2026 installments.

Would you like me to find the specific contact details or application links for any of these schemes in your state?
